👤 PROFILE

Artificial Intelligence and Machine Learning undergraduate with hands-on experience in Python, web development, and AI-based applications. Built real-world projects focused on social impact, including a farmer's product's sell platform. Seeking entry-level AI/ ML or software engineering roles to apply problem-solving and development skills.

📁 PROJECTS

Farmers Management System

Developed a Farmer Management System enabling farmers to list and sell agricultural products online, supporting product management, order processing, and digital payments to connect farmers directly with buyers. Improved market access and transparency by reducing middlemen, providing real-time pricing, sales tracking, and basic analytics to help farmers manage inventory and increase profitability.
